

How to Run the "Smartnoise Web App" Chrome Extension

Step 1: Download the Extension

First, you need to download the "Smartnoise web app" Chrome extension. You should have received a .zip file that contains the extension. If you haven't received the file yet, please contact the person who sent it to you.

Step 2: Unzip the Extension

Next, you need to unzip the extension. To do this, simply right-click on the .zip file and select "Extract All". Choose a location where you want to save the unzipped extension.

Step 3: Open Google Chrome

Open Google Chrome on your computer. If you don't have it installed, you can download it from the Chrome website (<https://www.google.com/chrome/>).

Step 4: Access the Extension Management Page

In Google Chrome, type "chrome://extensions/" in the address bar and press Enter. This will take you to the extension management page.

Step 5: Enable Developer Mode

In the top-right corner of the extension management page, you will see a switch labeled "Developer mode". Toggle this switch to the "On" position.

Step 6: Load the Extension

Click the "Load unpacked" button in the top-left corner of the extension management page. This will open a file browser window.

Navigate to the location where you saved the unzipped extension and select the folder that contains the extension files. Click "Open" to load the extension.

Step 7: Start Using the Extension

Congratulations! You have successfully loaded the "Smartnoise web app" Chrome extension. You should now be able to use the extension by clicking on its icon in the Chrome toolbar.

If you have any problems or questions, please don't hesitate to contact the person who sent you the extension. They should be able to provide further assistance.
